

# TK 1215

HDMI-HDMI V2.0 CABLE  
MALE-MALE  
LENGTH 1.5MT

# Teknomak

- 24K gold-plated contacts offer better corrosion resistance and better signal transfer.
- Full coverage provided by the high density polyethylene and polyvinyl chloride outer protective casing, to isolate from external signals.
- The metal braided profile and aluminum shield protect against interference from external signals, ensuring stable transmission and reducing signal loss.
- HDMI male A to male A: cable, 4K video and audio return channel (ARC).
- Compatible with HDMI standard (4K video format at 60Hz, 2160p, 48bit / px color depth)
- It supports bandwidth up to 18 Gb / s and is backward compatible with previous versions.
